# **APPENDIX ITEM 9.9**

---

 **Secondary art works**

 **Primary art works.**

Primary works have been located along the green link at key development sites, where the community is likely to gather. These are intended to be major, iconic works identifiable with the Catalina subdivision. Their location reinforces the green link concept.

Secondary works have been proposed as:

- suites of works along the greenway at the proposed nodes;
- at entry points to Catalina and may form part of civil construction;
- in public open space and may be sculptural or landscaping infrastructure
- temporary or ephemeral works for the village centre.
